**For Immediate Release**

## **Stampede Adds Award-Winning Video Processors to Product Offering**

*DVDO now available at Stampede*

BUFFALO, N.Y., September 12, 2006 — Stampede, a leading value-added distributor of presentation and home theater technology, today announced that it has entered into a distribution agreement with DVDO, an international award-winning manufacturer of video format conversion products. Under the terms of the agreement, Stampede will sell the entire line of DVDO high definition video processors to dealers in the United States, effective immediately.

“As the switch to HD becomes more crucial, format conversion issues will become an even higher priority for dealers, especially those who serve the home theater market,” said Kevin Kelly, vice president of sales and marketing at Stampede. “At Stampede, we are always looking to meet the needs of our dealers — and DVDO does just that by delivering world class performance and technology compatible with the thousands of audio/video products we sell.”

DVDO processors, switchers and hubs provide a wide range of output resolutions, aspect ratios and refresh rates — independent of input devices. The products accept all standard NTSC and PAL video formats, ATSC-standard DTV 480p, 720p and 1080i high-definition video. This makes them suitable to use with all video products worldwide including DVD players, VCRs, digital video recorders, laserdisc players, DLP and LCD projectors, satellite TV receivers and personal video recorders such as TiVo and ReplayTV.

“Partnering with Stampede allows us to focus more of our energies into new product development and brand marketing,” said Tom Strade, director of marketing and business development for DVDO. “We can leverage the channel relationships and efficiencies of product delivery, pre-sales inquiry handling and reseller development that have become a hallmark for Stampede.”

To celebrate the agreement, Stampede will feature select DVDO products at its booth (#609) at the Custom Electronic Design and Installation Association (CEDIA) Expo from September 14–17 at the Colorado Convention Center in Denver. Visitors to the Expo are also encouraged to visit the DVDO booth (#485) to see the official launch of the iScan™ VP50, the latest addition to its award-winning product line.
