

STAMPEDE TO SHOWCASE ULTRA-D GLASSES-FREE 3D DISPLAYS AT THE 2014 DIGITAL SIGNAGE EXPO

AMHERST, NEW YORK February 6, 2014 – Stampede Presentation Products, Inc., North America’s largest distributor of ProAV solutions, today announced that it will feature Ultra-D™ glasses-free 3D displays at next week’s 2014 Digital Signage Expo in Las Vegas, marking the first time that the revolutionary technology from Stream TV Networks will be showcased at the world’s largest international trade show dedicated to digital signage, interactive technology, and Out-of-Home networks. As the industry-leading distributor of ProAV equipment, Stampede has a much-deserved reputation for being the first to bring new cutting-edge technologies to the commercial market.

“I’ve seen several attempts at glasses-free 3D in the past, but when I saw Ultra-D for the first time, I knew this was something that would bring significant and immediate benefit to the customers our 11,000 dealers serve,” said Stampede President & COO Kevin Kelly. “This is the breakthrough 3D solution our customers have been waiting for.”

Stream TV CEO Mathu Rajan added, “We are excited that Stampede will be presenting Ultra-D at such a high-profile show. As our global focus expands to the commercial market, we can’t think of a better distribution partner.” According to Rajan, Ultra-D enabled products released by Stream TV’s brand partners will be added to Stampede’s product catalogue later this year.

Featuring a 4K panel for maximum clarity, Ultra-D delivers a wide-angle viewing experience that is completely comfortable, eliminating complaints of motion sickness and the need to be in a “sweet spot” to get a great 3D effect. A room full of people can simultaneously experience Ultra-D’s vibrant no-glasses-required 3D, making it the perfect solution for digital signage and other commercial applications.

Ultra-D can be seen on display at the Stampede Digital Signage Expo Booth #325 in Hall A of the Sands Expo Center in Las Vegas, Nevada.

About Stream TV Networks, Inc:

Stream TV’s Ultra-D™ technology is a proprietary glasses-free 3D solution that delivers both a stunning display as well as content conversion from any 2D or 3D source. Ultra-D’s patented hardware, middleware and sophisticated-software algorithms visually transport TV, computer or any other platform/device viewer into an unrivaled real-world 3D experience with adjustable depth that consumers can customize to their liking. www.ultra-d.com.

About Stampede

Known for its value-added distribution, Amherst, New York-based Stampede is the leading distributor of presentation equipment including LCD/DLP projectors and flat panel displays. Stampede provides a complete range of brand name presentation equipment to a variety of audio/video, computer, and home theater resellers and integrators in the United States, Canada and Latin America. These resellers rely on Stampede for value-added services in distribution, marketing and solution-based sales. Stampede annually produces the "Big Book of AV," a 1000-page catalog and companion website (www.BigBookofAV.com) providing hundreds of sales, installation and spec tips for Stampede's dealers in addition to product details on more than 5,000 SKUs.
