The StageScreen® features interchangeable frame pieces. All available sizes utilize combinations of the same frame sections; these interchangeable parts make it easy to reuse frame pieces to create different size viewing formats. The viewing surface attaches to the perimeter frame easily with Draper’s unique DuraLoop™ bungee cords. With sizing flexibility, StageScreen® enables a greater return on initial investment for the AV rental markets, while offering an optimal solution for streamlining inventory.

**FEATURES**
- Fixed-tensioned projection screen designed to be wall-mounted or flown. Mounting fasteners not included.
- Color-coded frame and instructions ensure fast and easy assembly with no hinges, snaps, or cranks required.
- Frame sections are connected with permanently attached threaded links and guide pins.
- Viewing surface attaches easily to perimeter frame with DuraLoop™ bungee cord loops. DuraLoop™ lasts longer than traditional snaps and provides self-centering tension for better image quality.
- The image area of each screen is exact and true to format.
- Utilizes an 8" (20 cm) truss that is significantly stronger than traditional truss folding screens. During in-house testing, StageScreen® trusses tested 60% stronger than folding truss screens.
- Includes wheeled heavy-duty polyethylene carrying case.
- WARRANTY: One year against defects in materials and workmanship.
- US PATENTS: legal/patents/

**OPTIONS**
- Maximum image width up to 1,440" (3,658 cm) wide.
