The TecVision Family of Surfaces
TecVision™ Engineered Surface Technology is offered in several exclusive formulations on Draper tab-tensioned and permanently tensioned screens. These formulations are designed to optimize performance and color fidelity in a broad range of settings and at a variety of light levels. White surfaces with gains ranging from 1.0 to 1.8 provide remarkably wide viewing cones. ALR (Ambient Light Rejection) surfaces offer excellent performance under higher room light levels. Other formulations offer performance needed for specific applications like blending and short throw applications in controlled ambient light, or 3-D.

HIGH CONTRAST/EXTRA WIDE VIEWING CONE/ON-AXIS GAIN OF 0.8
Formulated for use with ultra-short throw (UST) and short throw projectors in moderate to high ambient light applications, TecVision® XH800X UST ALR features a 0.8 gain premium ambient light rejecting surface. This surface can reject 57% of off axis ambient light, allowing it to achieve high contrast while still being able to support extremely wide viewing angles. Also available with an acoustically transparent nano perforated surface in limited sizes. The viewing surface is ISF™ certified for color accuracy and 8K ready to ensure optimal image performance at the highest resolution.

– Lens/Throw distance ratio for best brightness uniformity: 0.25:1 or longer.

SURFACE CHARACTERISTICS
– Maximum Image Height: 276" (701 cm) Always optically seamless
– Weight (g/sm): 388
– Thickness (mm): .35
– Cleaning: Mild soap and soft cloth
– Flame and mildew resistant
– Composition: Flexible PVC
