Meeting face-to-face is the best way to capture attention and build relationships. But too often, a lack of structure causes important meetings to waste precious time and deliver little or no results. The solution is a complete audio system designed for conferences and meetings. A conference system ensures that every participant can hear and be heard clearly, regardless of where they are sitting or the room acoustics. It can accommodate a casual, free-flowing discussion or a formal meeting. A conference system can even support multiple languages and provide meeting management capabilities.

**THE FREEDOM TO COLLABORATE**

**GREAT SOUND FOR EVERY PARTICIPANT**
Each user has their own microphone and loudspeaker, so sound quality is consistent even in large rooms with poor acoustics.

**POWERFULLY SCALABLE**
MXC can expand to handle up to 3800 meeting participants and 31 interpretation channels, making large multi-lingual meetings seamless.

**VARIETY OF FORM FACTORS**
MXC conference units are available in table-top, flush-mount, and modular styles that integrate perfectly in historic or contemporary furniture.

**INTUITIVE CONTROLS**
Each user has their own microphone and loudspeaker, so sound quality is consistent even in large rooms with poor acoustics.

**GREAT SOUND FOR EVERY PARTICIPANT**
Each user has their own microphone and loudspeaker, so sound quality is consistent even in large rooms with poor acoustics.

**WORKS IN ANY ROOM**
With a choice of hardware and software options, MXC is perfect for permanent installation in dedicated meeting rooms or temporary use at special events.

**NOTHING ELSE TO BRING**
MXC is a complete audio system, so external speakers, amplifiers, and processors are not required.

**MXC CUSTOMIZED COMPONENTS**
Bespoke MXC flush-mount units are available on request for venues with special architectural, aesthetic and design requirements or specific functional needs to match your meeting procedures.
CONFIGURE TO YOUR NEEDS

WITH PORTABLE, FLUSH MOUNT AND MODULAR COMPONENTS, MICROFLEX COMPLETE HAS A SOLUTION FOR ALL OF YOUR IMPORTANT SPACES.

DIS-CCU CENTRAL CONTROL UNIT

Controls conference units for up to 3,800 participants and 31 interpretation channels. Includes 2 analog audio inputs and 8 analog audio outputs. Requires FL6000 Feature License for use with MXC-series conference units. Requires licenses to scale to 3800 units or 8/16/31 languages.

SCALABLE FOR MANY APPLICATIONS

From an international conference to a city council or courtroom, Microflex Complete provides the premium audio intelligibility required for successful engagement between attendees — with customizable control to meet the specific needs of your application.

Presentation
Panel Discussion
Q&A

At large international conferences, every attendee is often an active part of the decision-making process. Microflex Complete with optional SW6000 software is a powerful, scalable conference system that allows seamless management of every aspect of conferences with up to 3,800 participants and 31 languages.

Clear and intelligible audio makes communication effortless even in very large rooms, while the optional SW6000 software suite provides meeting organizers with complete control of the speaker list, agenda, voting, and interpretation.

Audio System Components

01 MXC640 Touchscreen Conference Unit
02 MXCIC & IH6500 Interpretation Console and Headset
03 MXCSIGN Electronic Name Sign
04 DIS-CCU Central Control Unit
05 SW6000 Conference Management Software

INTERNATIONAL CONFERENCE
City councils must often document their proceedings and make them accessible to the public. The Microflex Complete conference system delivers excellent intelligibility for those in the room as well as listeners to live streams or recordings. It streamlines many of the administrative tasks necessary to create an agenda, verify attendance, and record votes, and can connect to audio/video recording equipment and a videoconferencing system. Available MXC630-F flush-mounted conference unit integrates microphone, loudspeaker, voting controls, and NFC ID card in one unit.

In a courtroom the outcome of a case can rest on the ability of the judge, jury, witness, and attorneys to hear testimony clearly, but traditional sound systems often compromise intelligibility due to installation limitations. Microflex Complete puts a microphone and loudspeaker within reach of every key individual for the highest sound quality, and interfaces easily with court recording and transcription equipment. Multi-track recording allows participants being recorded in the courtroom to be captured on separate channels for enhanced clarity.
SW6000 Conference Management Software puts the power to manage effective meetings and conferences at your fingertips. It allows you to personalize the Microflex® Complete digital conference system in endless ways, to keep every type of meeting on track — with 30 people or 3000.

Microflex Complete with SW6000 software scales to meet the needs of city councils that meet once a month, organizations that hold off-site meetings, and legislatures with intricate meeting protocols. SW6000 provides end-to-end capabilities that fit your requirements:

- Meeting Administration
- Agenda Planning
- Speaker Management
- Participant Identification
- Voting and Polling

No two meetings are the same, but all formal meetings need structure in order to generate results.
SW6000 SOFTWARE COMPONENTS

The SW6000 software suite includes the CAA Conference Administrator Application for pre-meeting setup and the CUA Conference User Application for active meeting control by a chairman or assistant. Additional CAA or CUA licenses allow multiple people to perform these tasks simultaneously. Optional software components let you add more capabilities to support your organization’s meeting needs.

**Use the included Conference Administrator Application (CAA) to perform meeting setup tasks**
- Create a participant table with roles, permissions, seat assignments, etc.
- Input agenda items
- Choose login requirements, program ID cards
- Set up conference equipment (conference units, name signs, displays)
- Generate reports documenting attendees, agenda, and outcomes

**Use the included Conference User Application (CUA) to run the meeting**
- Control microphones from list or seating diagram
- Set speech timers
- Select agenda items

**SW6000 VOTE MODULE**
Conduct electronic votes and polls, with options like:
- 1-5 button vote format
- Attendance check
- Pre-vote registration by PIN code or ID card
- Custom formulas to calculate quorum and pass condition
- Different vote weights
- Proxy voting
- Time limits
- Cast vote from a CUA

The meeting data provides an electronic record of vote results.

**Display meeting information on screens inside or outside the meeting room, such as:**
- Agenda
- List of speakers
- Seating diagram showing attendance, mic status, etc.
- Total and individual voting results
- Start/end time
- Interpretation channels
- Personalized displays

Additional CDA licenses (up to 16) allow multiple views to be displayed simultaneously.

**SW6000 ADV* MODULE**
- Enhance agenda items with hyperlinks to documents or websites
- Specify unique speech time limits for individuals, roles, or groups
- Accommodate guest speakers or VIP’s at podium conference units
- Align participants to specific groups or parties when at a secondary seat

*Use SW6000-ADV-50 for up to 50 participants

**SW6000 ESI MODULE**
Send live meeting data to third-party web streaming or transcription services, including:
- Speaker name, title, affiliation
- Current agenda item
- Vote status
